Creating Cloud Hosted Servoy App with Existing Visual FoxPro DBF Data

Bringing VFP Apps To the Web and More

Ken Levy
President
MashupX, LLC

Agenda

Servoy Overview
(Logical evolution from Visual FoxPro)

Servoy Demos
(Servoy in the cloud with DBF data and more)

Servoy Resources
(Links, downloads, and contact information)

“Servoy is the logical evolution for Visual FoxPro.”

- Ken Levy, former Visual FoxPro product manager

"Servoy is the ideal dynamic and data-centric development platform for Visual FoxPro developers. Beyond a great platform to evolve Visual FoxPro applications, Servoy also offers cross-platform (Windows, Mac, and Linux) for development and runtime, cloud computing scenarios, and cross browser with mobile web development. Servoy is the logical evolution for FoxPro applications and VFP developers into the next decade.“

- Ken Levy, former Microsoft Visual FoxPro product manager.
