### COMMENT

## Disagreeing With Consensus

- The current consensus on Best Buy is that cash flow is on its way to zero, joining such illustrious retailers as Circuit City, CompUSA, Good Guys and many other consumer electronic chains. We disagree with that for a number of reasons and while we are not changing our rating, we like the idea that this “mismanaged” chain trades at just over 2x cash flow, has over a 20% free cash flow yield and is universally hated by all the smart money.
- Reasons to consider the name: First, this company achieved strong free cash flow with management making significant errors, in our view. These errors include BBY’s failure to develop an Internet presence to compete with Amazon (or anyone online), ignoring the customer experience while being overly focused on stores, letting price become a negative weapon against them, failing to change the company’s compensation structure to commission salespeople (except in BBY mobile), as well as training associates poorly in the store, and not reducing store sizes to create higher service and more effective store formats. Nonetheless, BBY’s position as the largest brick and mortar store has maintained its importance for manufacturers and led to strong cash flow despite itself. Imagine the company’s potential if new management starts correcting some of the many flaws we have highlighted.
- Second, we were encouraged by last week’s announcement that BBY’s Canadian stores will match and beat any on line price. We feel this is an obvious strategy to turn store locations from a disadvantage into an advantage. Given BBY’s market share, we assume that it will be able to convince suppliers to pay for any price match required. We are pleased with the initiative and await a similar strategy in the US.
- Continued on next page...

**DISCLOSURE APPENDIX CONTAINS ANALYST CERTIFICATIONS AND THE STATUS OF NON-US ANALYSTS. U.S. Disclosure:** Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

- Third, BBY has much stronger internet leadership under Stephen Gillett's stewardship. Fourth, BBY is rolling its commission structure to appliances and hopefully to other parts of the store. Fifth, interim management seems more focused on shrinking the store base and improving service levels in the store.
- Finally, and very importantly, other Internet players, including Google, are looking for ways to partner with brick and mortar retailers to move more product search clicks through Google as opposed to Amazon. Given the tax situation equalizing in 2013, price match efforts and hopefully an improved site, BBY could be in an ideal position to use its stores as an advantage in this arena.
- Why not change the rating? Quite frankly Management is in flux, with articles about the old Chairman possibly coming in, the interim CEO making it quite clear that he would like to be considered for the top position, and a search committee out looking for the best candidate. We are concerned that in the interim, the chain may lose even more focus, hurting near term results until more permanent leadership is in place. While one can argue it would be hard for the stock to decline from here, weak results could do just that if the near term remains rocky.

**Companies Mentioned** (Price as of 30 Jul 12)

Amazon.com Inc. (AMZN, \$236.09, OUTPERFORM, TP \$270.00)  
 Best Buy (BBY, \$18.06, NEUTRAL, TP \$20.00)  
 Google, Inc. (GOOG, \$632.30, OUTPERFORM, TP \$770.00)

4/12/12	651.01	770	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**Analysts' stock ratings are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of ±10-15%) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

	Global Ratings Distribution	
Outperform/Buy*	46%	(59% banking clients)
Neutral/Hold*	42%	(55% banking clients)
Underperform/Sell*	10%	(48% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

*See the Companies Mentioned section for full company names.*

**Price Target:** (12 months) for (AMZN)

**Method:** We use the discounted cash flow (DCF) method to calculate our \$270 target price for AMZN. Our 5-year DCF uses a 3% terminal growth rate and a market-implied discount rate derived by discounting our unlevered FCF (free cash flow) estimates from 2013 through 2017 to arrive at the stock's current trading price. We then applied this discount rate to our 2013-2017 unlevered free cash flow estimates for AMZN.

**Risks:** Risks to our \$270 target price for AMZN are a deteriorating global economy, competition from major offline retailers, volatility in operating margins, and unpredictable investment spending.

**Price Target:** (12 months) for (BBY)

**Method:** Our target price for BBY of \$20 reflects 5.5x our 2012 EPS estimate of \$3.65. We believe that the discount to other large cap discretionary retailers is warranted given the recent executive turnover at BBY, ongoing weak demand in the consumer electronics category, and fewer strategic initiatives to drive growth in the business.

**Risks:** Investing in hardlines retail stocks entails certain risks: changes in consumer spending and its components, retail industry competition, and general market risk. Other risks to BBY and our \$20 price target are increased competition from the discount store segment and increased reliance on overseas economies for the supply of its product.

**Price Target:** (12 months) for (GOOG)

**Method:** We use the discounted cash flow (DCF) method to calculate our \$770 target price for GOOG. Our five-year DCF uses a 3% terminal growth rate and a market-implied discount rate derived by discounting our unlevered FCF (free cash flow) estimates from 2008 through 2016 to arrive at the stock's current trading price. We then applied this discount rate to our 2011-2016 unlevered free cash flow estimates for GOOG.

**Risks:** Risks to our \$770 target price for GOOG are a deteriorating global economy, lower than expected penetration in mobile, volatility in operating margins, and unpredictable investment spending.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (AMZN, BBY, GOOG) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (AMZN, BBY, GOOG) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (BBY) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (AMZN, BBY, GOOG) within the past 12 months.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.
