

activEHR Learning Library Read Me First

Thanks for visiting the activEHR resource area on screencast.com. Here a few important tips to get you started.

Tip #1

Be sure to go to the top right side of the screen and select the Details View. This will change your view permanently. The Details View allows you to see more clearly the contents of each folder.

Tip #2

Screencast offers only one folder level, no sub-folders. Once you open a folder, the items contained therein are numbered to keep them in chronological sequence.

Tip #3

When you open a folder, note that its contents can be sorted by Name, Size and Date. Each option also has an up and down arrow, for ascending or descending order. If things seem out of order, it's likely the Sort sequence has been changed.

Tip #4

Screencast is convenient for viewing videos, less so for PDFs and PPTs, and other file types. While we can post articles here, you'll need to download them before viewing. Note that after clicking Download, you have the option to immediately view the document by clicking Open, or you can choose to save it to your computer for future reference.

Tip #5

You'll notice that you can leave comments. If you find that something isn't working the way you expect or that you want to have something clarified which we show in a video, please feel free to leave a comment to which we can then reply.
