## Introduction

### Chapter 1: Introduction to Sprint Primer Workout

Hey, this is Rick Kaselj from Sprint Primer Workout and ExercisesForInjuries.com.

I want to go through what a Primer Workout is. A Primer Workout is my version of a warm-up. The problem that I see out there with regular warm-ups is all they focus on is lubricating and loosening up the joint. From my experience working with people with injury since 1994, you need to do a lot more than lubricating and loosening up the joint when it comes to a warm-up in order to help prepare the body, overcome injuries, and prevent injuries. And that's what I go through in a Primer Workout.

This Primer Workout is a Sprint Primer Workout, so it specifically focuses on sprint conditioning. If you're doing sprints when it relates to your workout, or if you're going out for a run, this workout will apply to that. And the 9 exercises that I'll go through in this program will help you when it comes to preparing your body, warming it up, preventing injuries, and overcoming injuries when it relates to sprinting and running.

Let me explain a little bit more about what a Primer Workout is. It all relates to the word P-R-I-M-E-R.

Looking at the letter P in primer, P stands for **preparation**. A Primer Workout will help prepare your body for what you're going to put it through. It can be a sprint workout, or it can be running. It's also transitioning your brain from whatever you were doing before to what you're going to do next. That becomes very important because if you're not prepared physically and mentally, it increases your risk of injury.

In the word primer, looking at the letter R. That involves **range of motion**. A lot of warm-ups out there target that, but I find a lot of warm-ups miss all of the ranges of motion that the body goes through or a joint goes through. I will go through that in my Primer Workout.

Looking at the letter I next, that is **isolation**. When it comes to my Primer Workouts, a lot of times they'll focus on specific joints. The Sprint Primer Workout is a little bit different. In this one we're focusing on a movement, and that's the running movement.

The letter M is **movement**. We want to prepare the body for the movements that we're going to go through. And with this Primer Workout, what we're doing is preparing for the specific movements involved with sprinting and in running.

Looking at the letter E in primer, we want to work on **endurance**. When it comes to the endurance side, we're not just doing one or two minutes. We're doing things for 5 to 10 minutes, waking up those stabilizing muscles and working on the endurance of the muscles.

Finally, the R in primer is **resistance**. We want to add some resistance when it comes to our primer movements in order to bring in those secondary muscle groups. A lot of times when it comes to range of motion exercises, we're working on the stabilizing muscles, which are important in order to protect joints from injury. When we start adding resistance, we're working those larger muscles that help when it comes to the gross movement.

More on range of motion. When we're doing the range of motion exercise, that helps lubricate the joints. Our joints are self-lubricating. With movement, they lubricate and move smoother, and the smoother they move, the better you can perform and the less likely you're going to get injured.

Also, with a primer exercise, as I've mentioned, with the range of motion exercises, we work on those stabilizing muscles. Looking at P, **preparation**, we're working the mind and connecting the mind to the workout that we plan to do, and we're more effectively grooving movement patterns. The more that we can groove the body in order to do specific movement patterns, the better we'll perform and the less likely we will get injured from the exercise that we do.

That explains what a Primer Workout is, and next I'll go through the Sprint Primer Workout and the 9 exercises involved in that.

So, make sure to do the 9 exercises. I encourage you to *not* do any kind of warm-up, do your sprint conditioning and do your workout, and see how you feel and perform. The next time, do the Sprint Primer Workout and see how you perform, as well as how feel with the Primer Workout, versus without it.

My guess is it will help you perform better, it'll allow you to feel better as you go through your sprint workouts and your running. It'll help with prevention and injuries, specifically lower body, foot, knee, hip, and back, but it will also help you overcome any injuries that you have.

Now we're going to go into the Sprint Primer Workout.

## Chapter 2: 9 Exercises To Do Before You Run

I'm going to go through 9 exercises that you can do before you go for a run or do your sprint conditioning workout which will help you prepare for your workout, and prevent any kind of injury when you go running.

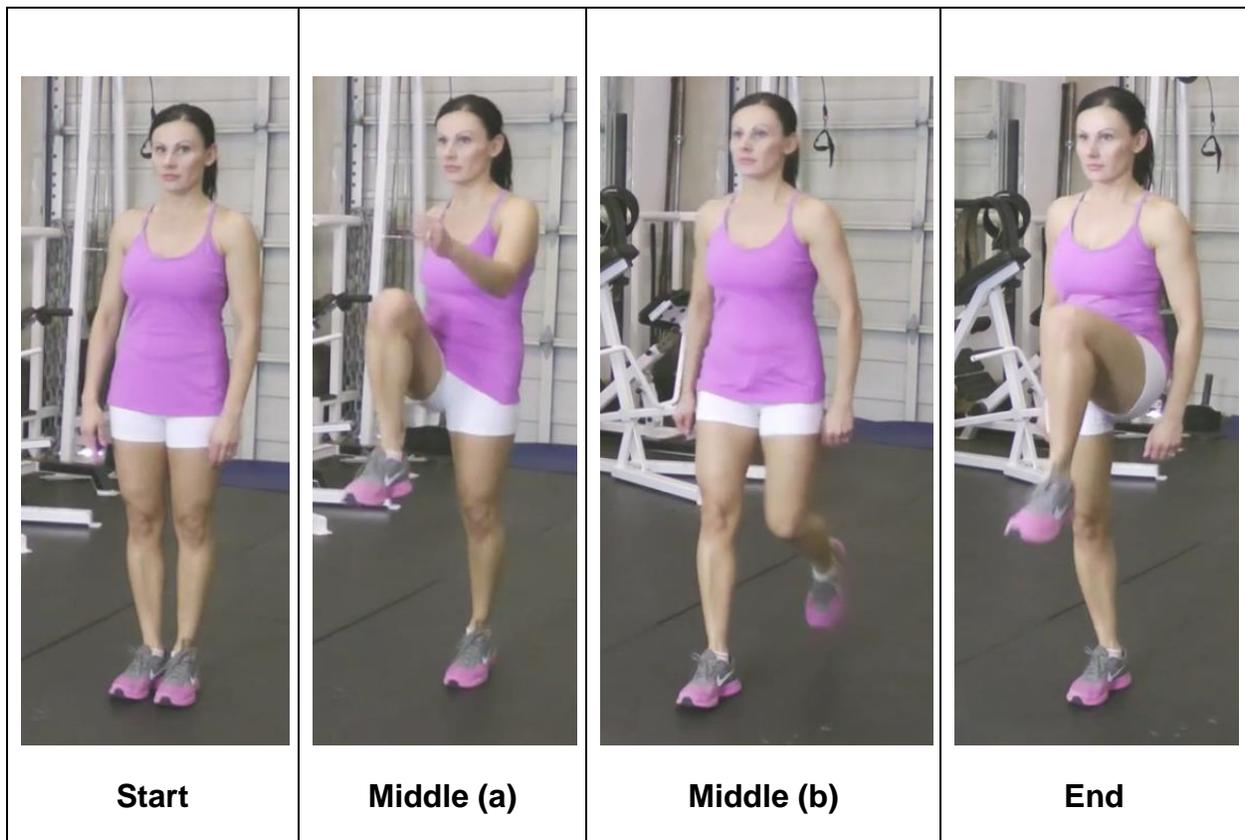

### 1. *Alternating Toe Raises*

The first one is Alternating Toe Raises. You're standing in one spot. You're going to come on to one toe, and then back down, come on to the other toe, and alternating back and forth. We're working the calf and the ankle through as much range of motion as we can. We're doing it one side at a time because when you're running or sprinting, that's pretty much what you're doing. You're lifting your body weight with your foot. We want to wake up the calf, and also work that ankle. Do about 5 on each side, so a total of 10.

## 2. High Knees

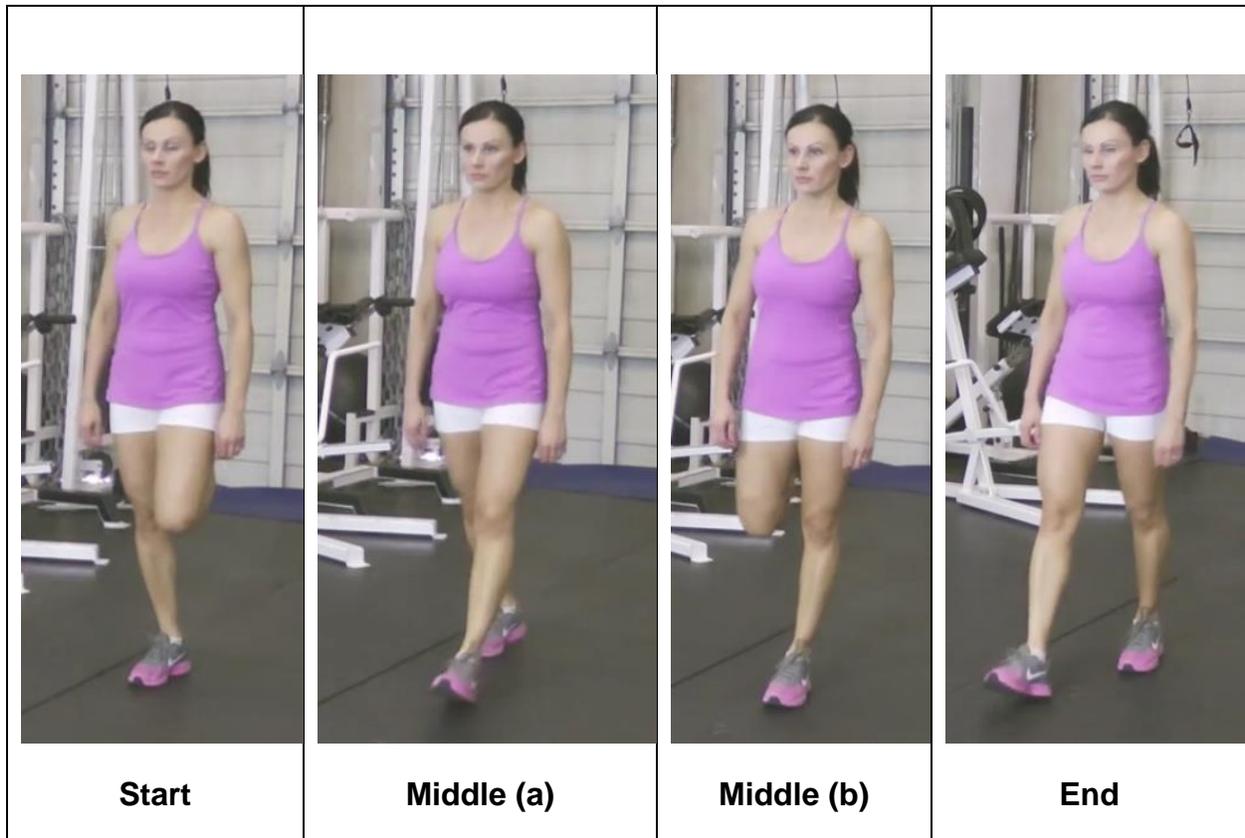

Now we move from standing in one spot, and we start adding movement. We are going with High Knees. You're bringing your knees as high as you can while still maintaining good upper body technique. And you're going to come back with high knees. So your upper body's in a good position, you're moving at the hips, you're bringing those knees as high as you can without any change happening in your low back. You're going for 10 repetitions or 20 repetitions, or you can go for a specific distance. It could be 15 feet or 30 feet.

---

### 3. Heels to Seat

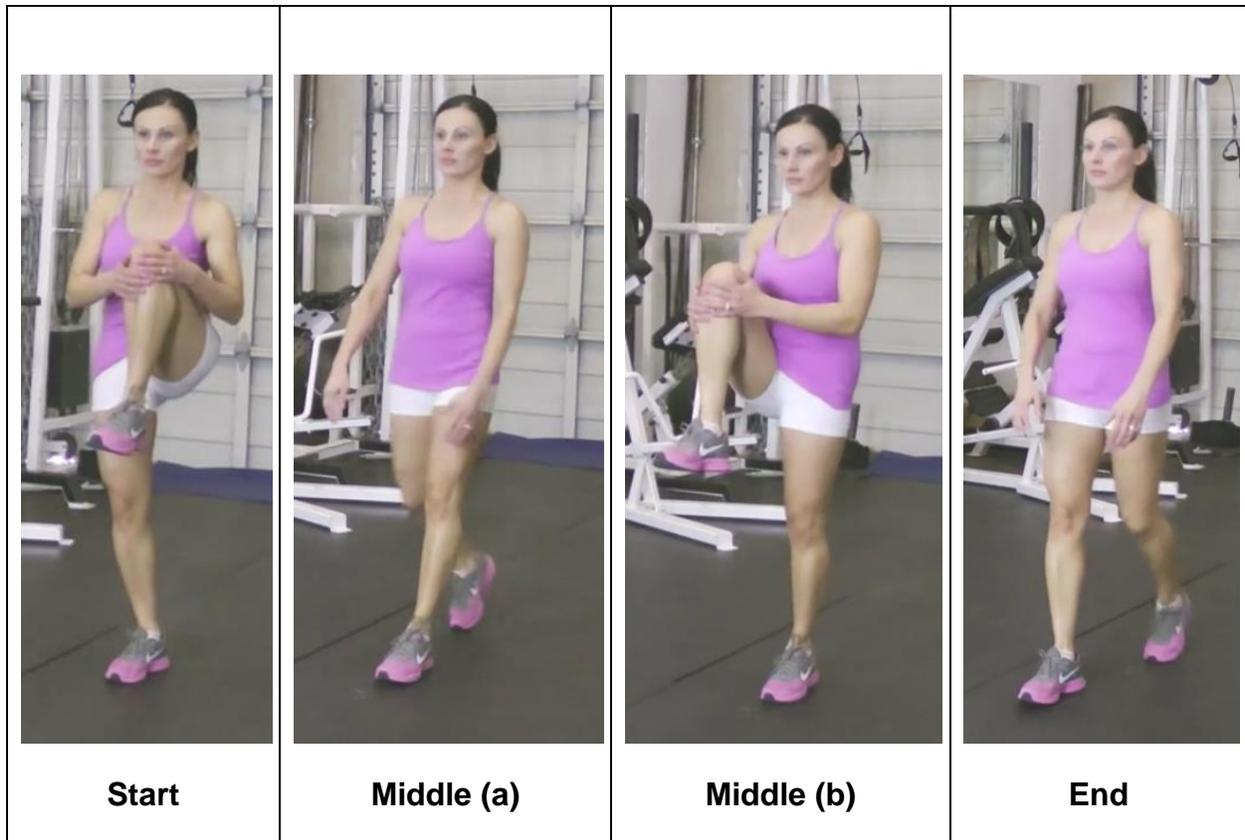

The third one is Heels to Seat. You're moving in a straight line, bringing the heel towards the seat, really working those hamstrings, and we're working the knee and hip joints. The previous exercise, we were really working the front of the hip and the quads. Just like with the one before, 10 or 20 repetitions, or go over a distance of 15 to 30 feet.

### 4. Knee Pulls

Now we're going to Knee Pulls. You're stepping, you're pulling the knee a little closer to your hip in order to loosen up the hip joint, get a little bit of stretch in the glutes and the hamstrings, and also loosen up the front of the hip. Going in a nice, controlled

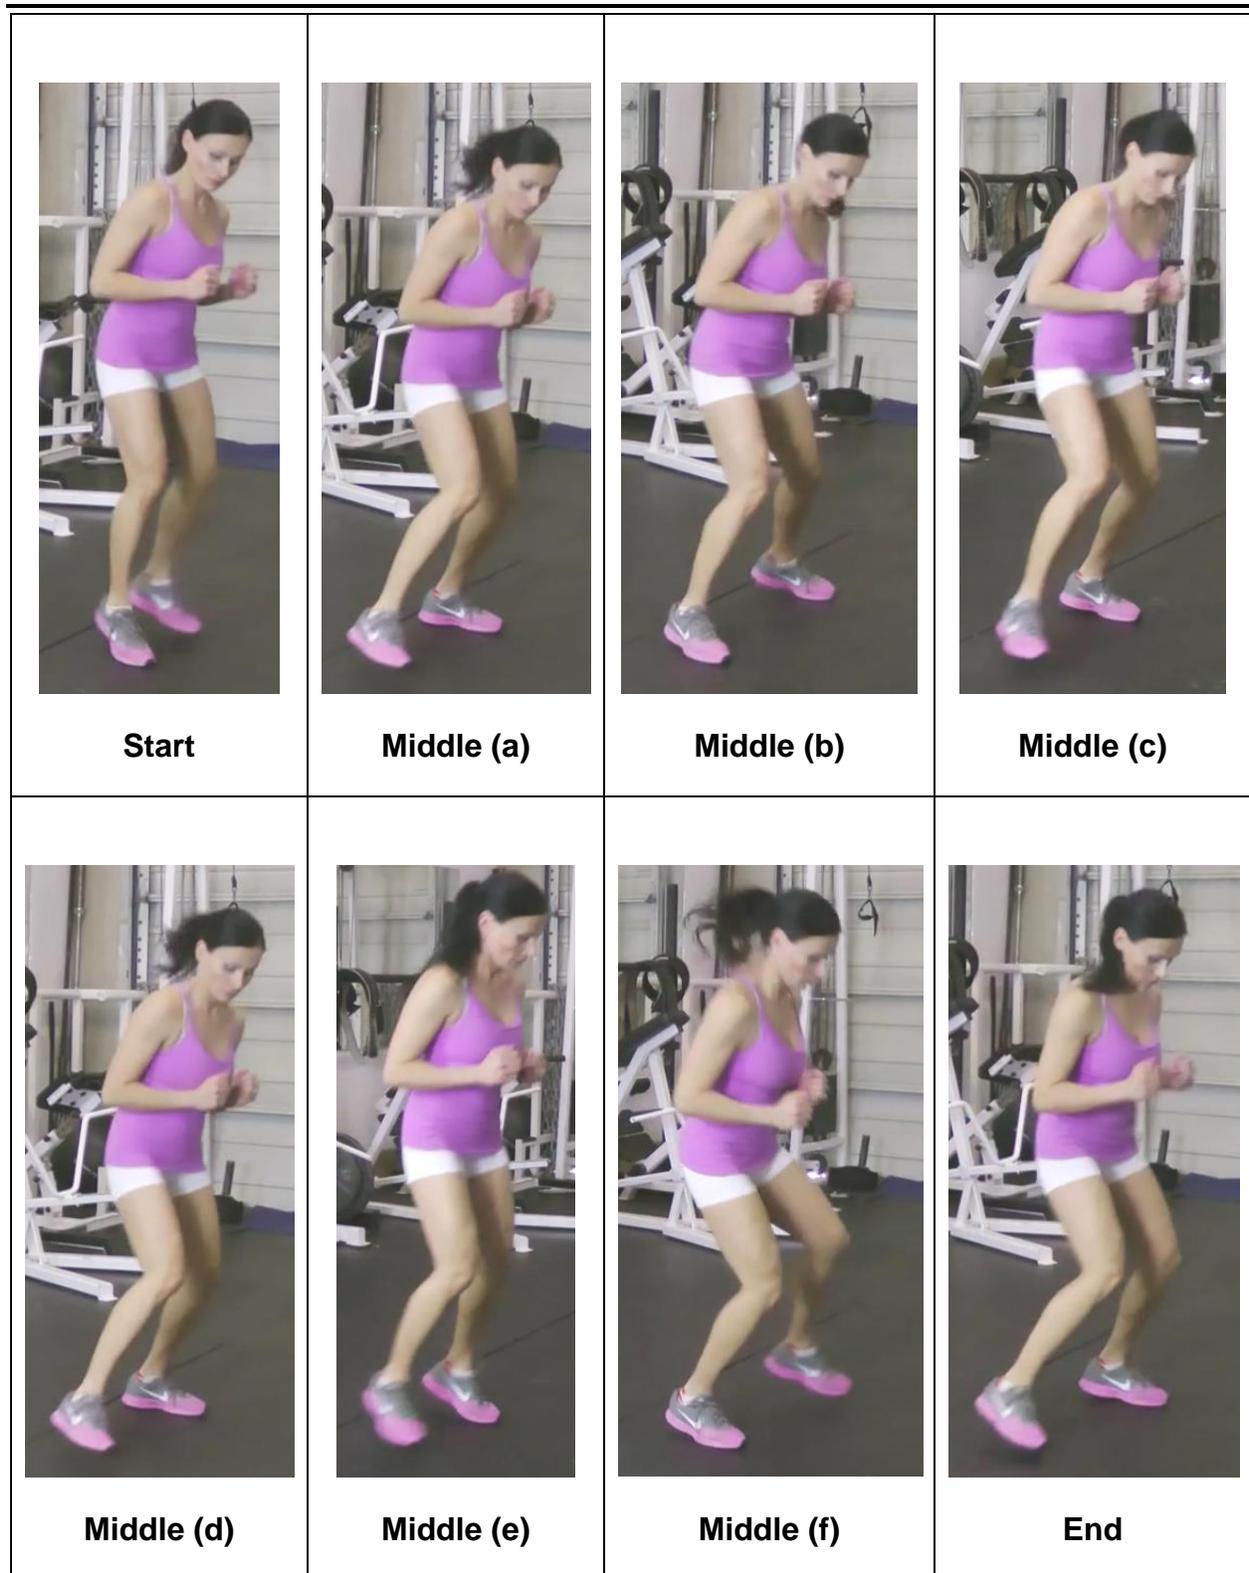

movement. Also with this knee pull, you work the stabilizing muscles around the hip, so we're trying to wake them up as well in this Sprint Primer Workout.

### 5. Side Shuffle

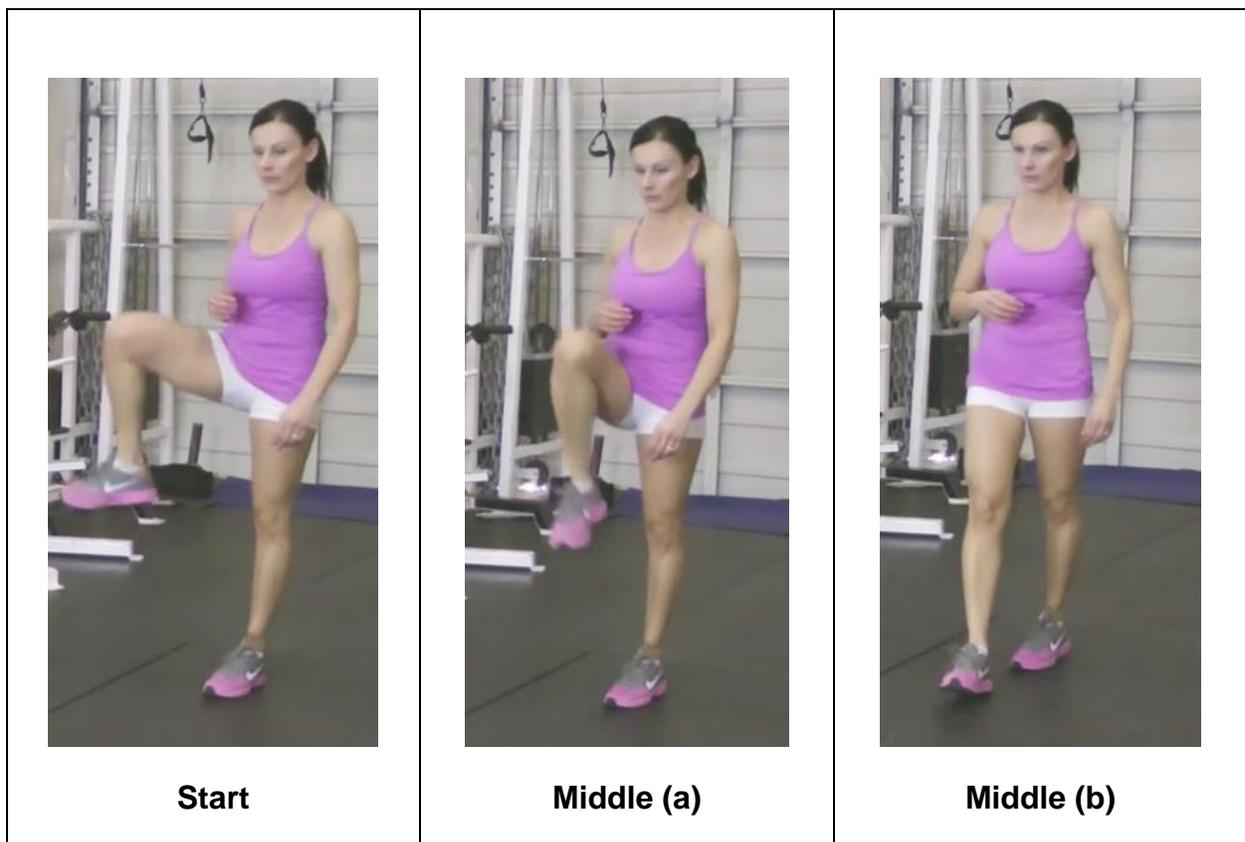

Exercise #5 is a Side Shuffle. You're just going to move sideways one way, and then sideways back. We're trying to stretch out the muscles in the hip in that sideways direction, and also work on the stability of the muscles in that hip area.

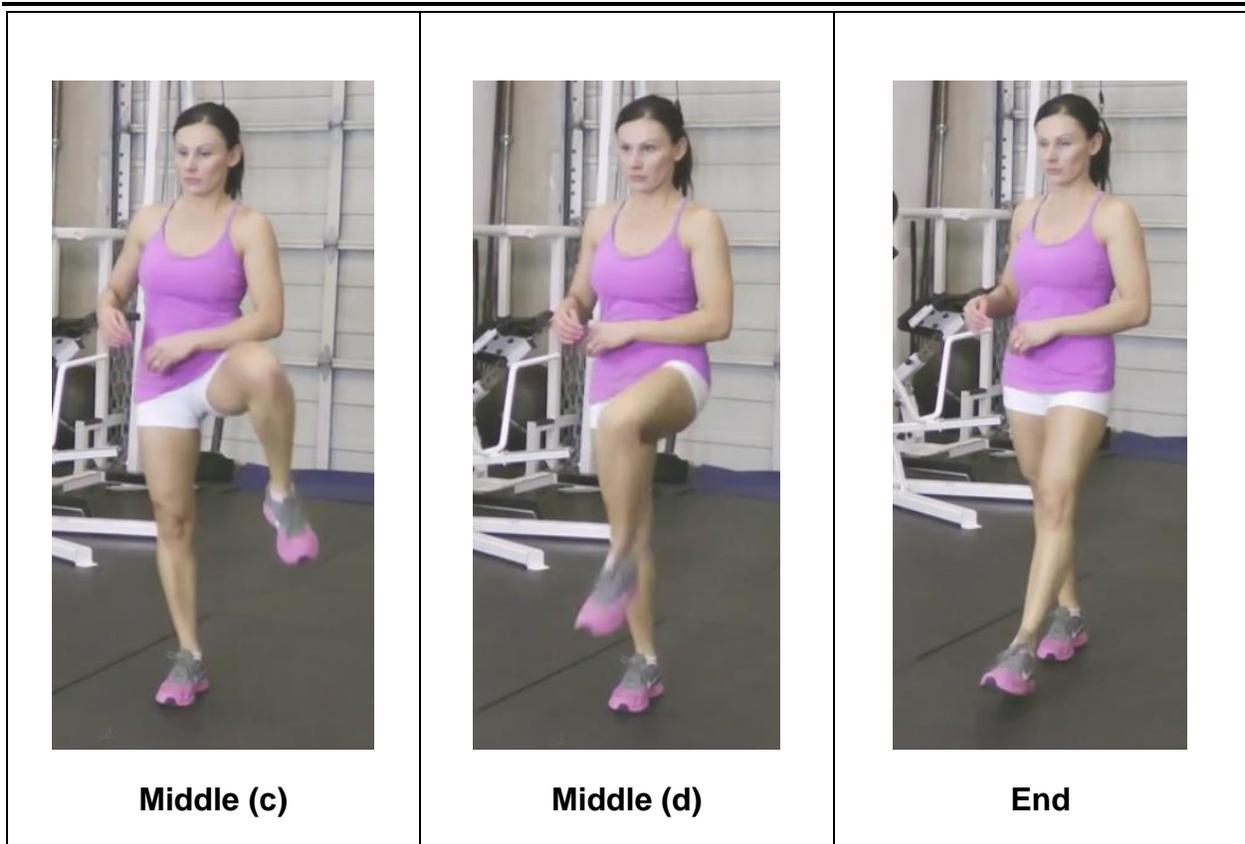

## Sprint Primer Workout

### 6. Pulling Knee In

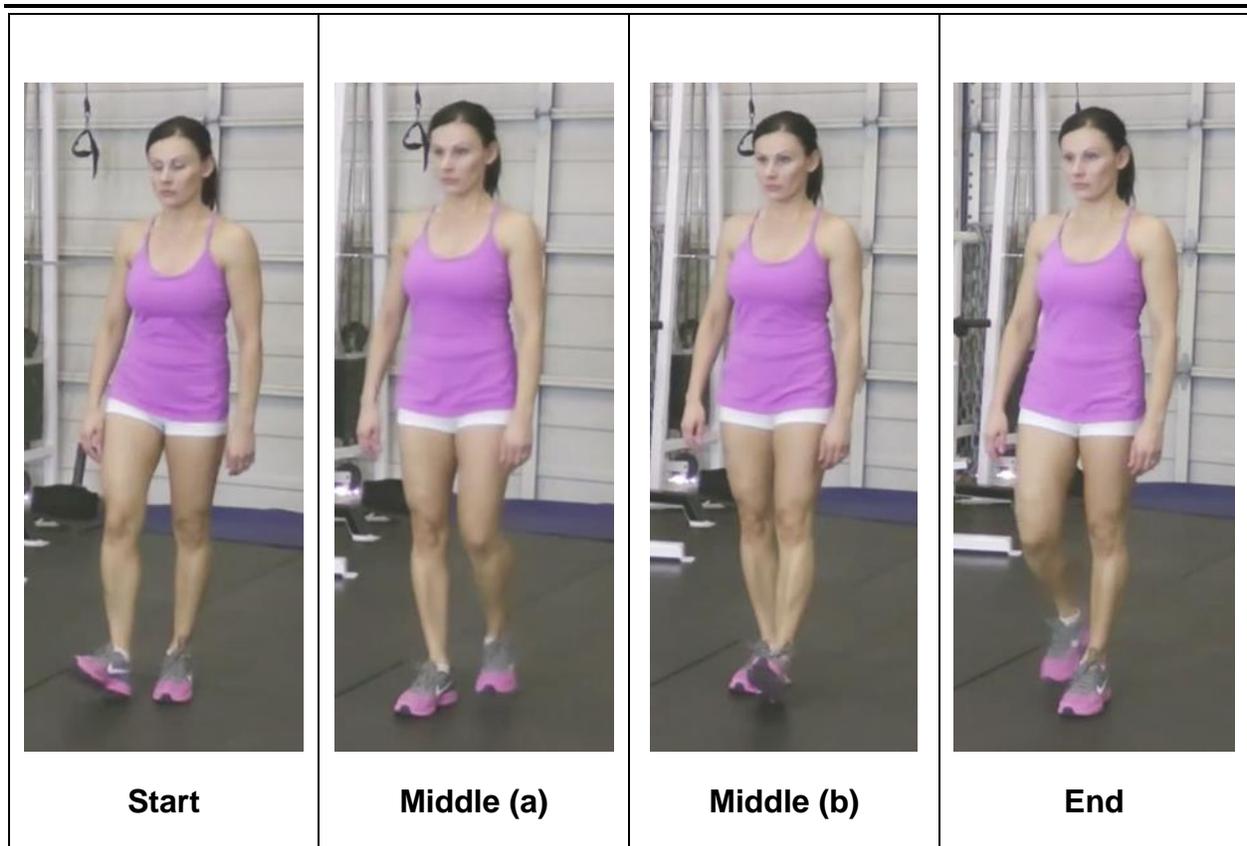

Exercise #6, we're doing a Knee Pull. You're coming up, you're pulling the knee in, and then you're going to the other side. Bringing the knee out, and bringing it in, stepping, bringing it out, and bringing it in. Now we're loosening up the hip, working on the balance in the supporting foot, knee, and hip, so really waking up those stabilizing muscles, and loosening up the hip with that pulling-in direction.

### ***7. Slow Motion Walking***

Exercise #7 is Slow Motion Walking. You're slowly walking forward, and you're really moving with intention from the heel, to mid-foot, and then toe. As you work through that heel, foot, and toe, really trying to loosen up and wake up that foot, because a lot of times with running and sprinting, people don't utilize their feet enough when it comes to the toe-off. You might have been at work with dress shoes, which affects how much mobility and movement you have in your foot or your ankle, which is why you really need to loosen it up.

### **8. Pulling Knee Out**

Exercise #8 is Pulling Knee Out. Now we're going in the exact opposite direction of #6. We're loosening up that hip in that opposite direction. With a lot of these Sprint Primer Workout exercises, we're focusing a lot on the hips to loosen them up, and also in that foot to loosen up the foot and the ankle.

## Sprint Primer Workout

**Start**

**Middle (a)**

**Middle (b)**

**Middle (c)**

**Middle (d)**

**End**

### 9. *Skipping*

Exercise #9 is Skipping. Alternating arms and legs. We're almost over-exaggerating running, getting the body used to taking impact, getting the body used to jumping, or getting ready for that sprint or running movement.

**Start**

**End**

### Chapter 3: Final Wrap Up

Those are the 9 exercises involved in the Sprint Primer Workout. The purpose of this is to get you ready for your sprint conditioning workout or to go running, this will prepare your body, prevent your body from getting injured, and also to help your body overcome injuries.

Make sure to swing by [ExercisesForInjuries.com](http://ExercisesForInjuries.com), enter in your injury or pain. There's a good chance that there's an article, a video, or an interview that will help you overcome your injury or pain.

This is Rick Kaselj from [ExercisesForInjuries.com](http://ExercisesForInjuries.com), saying, "Take care and bye-bye."

### About Rick Kaselj

Rick Kaselj, M.S. (Exercise Science), B.Sc. (Kinesiology), PK, CPT, CEP, CES

Hi, I'm Rick Kaselj. **I create exercise programs that help people heal injuries and eliminate pain, so they can go back to living a full, active, healthy life.**

I've always been a fitness and exercise enthusiast, so starting in 1994, I decided to make this my career also. I started as a personal trainer, exercise therapist and kinesiologist, but quickly discovered that many of the traditional exercise and treatment programs weren't producing the results I wanted for my clients...

...so I took it upon myself to get the right knowledge, scour the medical research, and do hands-on testing, so I could ACTUALLY help my clients get better.

With the advent of the Internet, I saw a terrific opportunity to offer and deliver my programs to many more people, so they too could finally get relief from pain, heal their injuries, and get back to the lives they enjoy.

#### **I USE RESEARCH, STUDY, AND HANDS-ON TESTING TO FIND WHAT REALLY WORKS TO HEAL INJURIES AND ELIMINATE PAIN.**

*I'm all about finding what works...* and unfortunately, a lot of the advice out there, even from trained professionals and reputable sources... *does not work!*

**Some of the most effective methods** I've discovered for eliminating pain and healing injuries are counterintuitive... and they required diligent research, testing, and creativity to discover.

**People get the best results** when they follow a program that's been properly designed. The best programs include only the exercises that are necessary, instructions for how to perform them properly, the proper order in which to perform them, and instructions for what the right amount of rest is, and when to take it. Not doing all the steps, or performing them in the wrong order, or taking too little rest, or too much, can throw you off course, and sometimes even make things worse!

**I've learned** that understanding the CAUSE of injuries and painful conditions can help heal and prevent them. For example, most people don't realize that they're doing certain things every day that put stress and tension on certain muscles, tendons, tissues and joints, and over time, this creates chronic pain and injury. Simply becoming aware, and then making tiny adjustments, can actually result in a much higher quality of life for many people.

**All of my injury and exercise programs were developed as a result of my research, study and years of hands-on testing and training:**

- I've been in the fitness and rehab industry since 1994.
- I spent 6 years at University studying kinesiology, corrective exercise and therapeutic exercise, and got my Master's Degree in exercise science.
- I have 16 years of hands-on experience, working directly with clients and teaching my techniques and programs to fitness professionals, Kinesiologists, and healthcare providers.
- I've conducted thousands of personal training sessions.
- I've carefully scrutinized hundreds of relevant medical research papers.
- I'm also an author and speaker and I've given over 260 presentations to more than 5,000 fitness professionals across Canada and USA.

### WHAT MY CLIENTS AND CUSTOMERS SAY:

“Your exercises have changed my life. I have been in constant pain for 15 years.” **Shelley Watson, Carmel, CA**

“I just wanted to say thank you for providing what I needed to resolve my hip problem! After following your exercises, I went through work all day with no pain and no pain medication. Yeah!! Thanks so much for a simple answer to a problem I have been dealing with for months.”  
**Tracy Walker, North Carolina**

“Before I used the information, I couldn’t walk normally for at least the first 15 minutes each morning. After using the program, I only have a little pain, but it eventually all got better with continued attention.” **Cher Anderson, Athens, TN**

“Thank you Rick, you saved my career!” **Marco Mura, Professional Forester, Sardegna, Italy**

“I used the 90 second pain relief alone and it helped relieve the pain right away and after playing sports I feel better and the pain is not as intense. I thought I would just have to retire due to the foot pain, but I now see there is hope with your program it has helped me a lot.” **Audal Acosta**

---

### I HAVE A FREE GIFT FOR YOU...

#### THAT WILL START DECREASING YOUR PAIN NOW!

Before we go any further, I want to send you some of my very best stuff FOR FREE!  
It's my introductory gift to you. (I like to give value first, and be as helpful as I can upfront.)

My newest DVD is called "The Pain Hacker" and **I want you to have it for free.**

What is it? It's an extensive collection of 90-second pain fixes that you can do to start reducing the pain you have right now. On the video, I go through each technique slowly and carefully to show you exactly how to do them, so you can start reducing your pain and get back to a healthy, more active life.

I don't want to give away too much here, but...

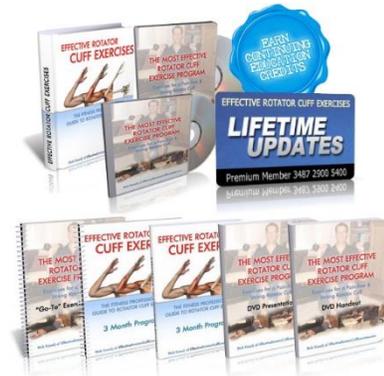

- "The Pain Hacker" DVD contains 90-second pain fixes for shoulder, back, knee, elbow, foot, neck, wrist, hip, hand pain, and much more.
- The pain techniques in this DVD will work for you regardless of your current health condition, gender or age!
- With your free DVD, I'm also going to throw in two bonus programs that will teach you simple exercises that could radically change the way you feel, day-to-day.
- My unconventional "Pain Fixes" in your free DVD have been featured and talked about in these publications (and more).

Get your FREE DVD at: [www.ThePainHacker.com/free-DVD-2](http://www.ThePainHacker.com/free-DVD-2)

### Other Products from Rick

#### Heal Rotator Cuff Injuries FAST

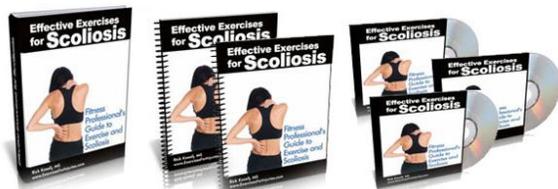

This comprehensive toolbox of 57 rotator cuff- specific exercises is EVERYTHING you need to help your clients decrease pain, improve range of motion, and increase strength in their rotator cuffs. Here are just a few of the things you'll discover:

- Why exercises that strengthen rotator cuffs do not necessarily decrease pain and increase range of motion in your clients' shoulders
- Why you shouldn't give the same exercises to every client with rotator cuff problems
- How to PROPERLY design an exercise program for the rotator cuff (I spent an entire year researching this at university, and wrote and published a paper on it in the Canadian Journal of Kinesiology)

Learn more at: [www.EffectiveRotatorCuffExercises.com](http://www.EffectiveRotatorCuffExercises.com)

#### Scoliosis Secrets

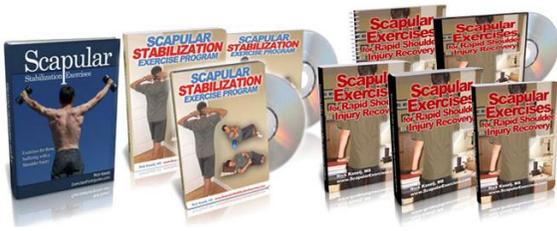

In just a few weeks, your Scoliosis patients will be thanking you! This program delivers the knowledge and exercises you need to safely and effectively train or heal anyone with Scoliosis. Here are just a few samples of what you'll learn and get in this program:

- The Three 'O' medical treatments for Scoliosis, and step-by-step instructions on how to do them
- The 7 different types of Scoliosis... how to diagnose your clients... and which exercises to prescribe for each
- CLIENT HANDOUTS that you can copy and give to your clients, completely DONE FOR YOU!

Learn more at: [www.EffectiveExercisesForScoliosis.com](http://www.EffectiveExercisesForScoliosis.com)

### Scapular Stabilization Secrets

This is the RESEARCH- BACKED exercise program that will finally help your clients decrease pain, improve range of motion, and increase shoulder stability. What will you learn?

- My secret weapon for healing shoulder injuries
- Why most trainers and therapists focus on the rotator cuff in a shoulder injury, when they should focus on improving the activation, endurance, and strength of the scapular muscles
- Why your Scapular Stabilization exercise program is a waste of time... unless it includes all 5 of these components

Learn more at: [www.ScapularStabilizationExercises.com](http://www.ScapularStabilizationExercises.com)

### Eliminate Calf Pain (Achilles Tendinitis and Tendinosis)

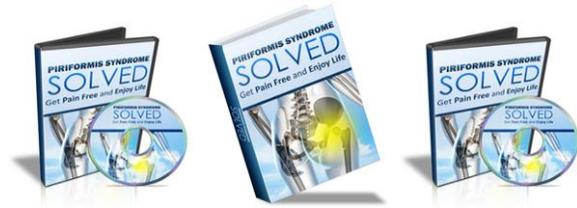

Do you have recurring pain in your calf? Have you been diagnosed with Achilles Tendinitis or Tendinosis? If so, my research -backed video exercise program is for you! Simple step-by-step videos take you through a specially -designed program to eradicate your calf pain, Achilles Tendinitis, and Tendinosis ONCE AND FOR ALL. You'll be back to hiking, walking and running before you know it. Here's a small sampling of what you'll learn in the program:

- QUICK START (non-exercise) techniques you can use to start melting your calf pain away RIGHT NOW
- ALL the exercises you need to eliminate your calf pain... AND I'll tell you the exercises that are commonly prescribed, but you don't need to worry about
- How to do each exercise, with slow, step-by-step instructions... the correct order you should follow... and how much rest you should take... to get the best and fastest results

Learn more at: [www.AchillesTendinitisExercises.com](http://www.AchillesTendinitisExercises.com)

### Eliminate Piriformis Syndrome

The step-by-step exercise program that ANYONE can do... that heals your Piriformis Syndrome, and allows you to: take long walks again, watch entire movies without getting up, easily lift your child... all without any pain. Here are just a few samples of what you'll learn and get in this program:

- Why you need to do more than just strengthen your core to eliminate your Piriformis Syndrome
- How to start decreasing your pain IMMEDIATELY, WITHOUT ANY EXERCISE
- These stretches and exercises are making your Piriformis Syndrome WORSE

Learn more at: [www.PiriformisSyndromeSolution.com/end-piriformis-pain](http://www.PiriformisSyndromeSolution.com/end-piriformis-pain)

### Fixing Tight Hip Flexors

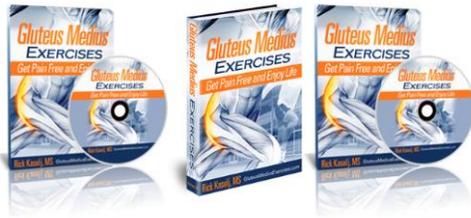

This video program has 35 exercises and other techniques designed to help you overcome painfully Tight Hip Flexors... without expensive appointments, drugs, or surgery. You'll be back to walking, running, and creating fun memories with your friends and family in just a few weeks! Here's a small sampling of what you'll learn in the program:

- THE SINGLE MOST IMPORTANT movement you need to do in order to overcome your Tight Hip Flexors (it's Component #8 in the program)
- Why it's important to decrease stress and tension in your knee, in order to fix your tight hip flexors... and how to do it properly
- The 8 CRITICAL COMPONENTS that must be included in any effective program for fixing Tight Hip Flexors (these components come from 16 years of hands-on experience and careful scrutiny of 30 separate medical research papers)

Learn more at: [www.FixingTightHipFlexors.com](http://www.FixingTightHipFlexors.com)

### Heal Back Pain (Gluteus Medius Strength Program)

This exercise program **ELIMINATES BACK PAIN** by strengthening your Gluteus Medius. The Gluteus Medius is often ignored, but when properly exercised and strengthened, it can stabilize your pelvis and decrease stress on your back, which eliminates back pain. In this program, you'll learn these things (and much more):

- How to eliminate your back pain as quickly as possible (HINT: you must do the exercises in the right order so they build on each other and your progress is multiplied!)
- What most trainers and physical therapists don't know about back pain and the Gluteus Medius
- Why exercises that target your knees and hips also strengthen the Gluteus Medius and help with back pain

Learn more at: [www.GluteusMediusExercises.com](http://www.GluteusMediusExercises.com)

### Best Gluteus Maximus Exercises

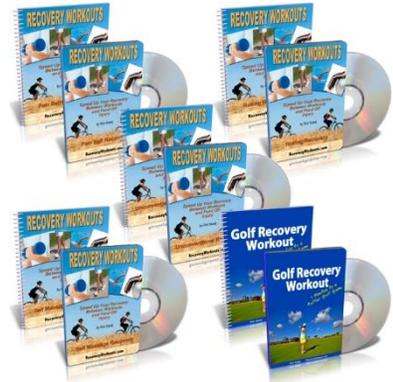

This is a fast, simple, safe, and effective program for improving your Gluteus Maximus. Most health and fitness professionals don't know about this program, or are doing it wrong. In as little as 7 days, you can go back to pain-free walking, running and living! Here are a few samples of what you'll learn in the program:

- Stretches and exercises that actually make your Gluteus Maximus **WORSE**
- Common mistakes people make doing Gluteus Maximus exercises
- The correct form for all of the exercises, shown step-by-step on easy-to-follow videos

Learn more at: [www.BestGluteusMaximusExercises.com](http://www.BestGluteusMaximusExercises.com)

### How To Speed Up Recovery Between Workouts

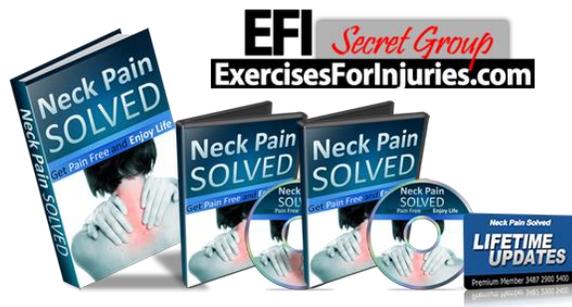

SPENDING A CENT!

Do you want to get better results from your workouts? Experience fewer aches, pains and injuries between workouts? Spend less time and money at the massage therapist? This comprehensive video program is going to help you achieve all that and more. Here are just a few of the things you'll be learning:

- What you should NEVER do if you have aches and pains between workouts
- 3 techniques and unconventional tools that RAPIDLY speed recovery between workouts
- How to get the powerful recovery effects of massage, WITHOUT

Learn more at: [www.RecoveryWorkouts.com](http://www.RecoveryWorkouts.com)

### No More Neck Pain

What if you could PERMANENTLY end your neck pain? This INNOVATIVE video program will teach you the simple movements and proven exercises that will make that a reality for you. Here are a few of the things you'll learn:

- An UNUSUAL technique that can start melting your neck pain away IMMEDIATELY
- How to get lasting, long- term relief for your

neck... not just a temporary fix

- What I learned working with hundreds of clients with neck pain that most other professionals will never know

Learn more at: [www.NeckPainSolved.com](http://www.NeckPainSolved.com)

### Erase Foot & Heel Pain (Plantar Fasciitis)

How do you eliminate Plantar Fasciitis? Do the right exercises, in the right order, with the right amount of rest. This simple, 12-week program gives you EXACTLY what you need to permanently erase your foot and heel pain. Here's a small sampling of what you'll learn:

- Why trying to strengthen your plantar fascia is a common mistake, and only makes your heel pain WORSE (hint: the plantar fascia is not a muscle!)
- One simple technique that anyone can do... that will get rid of your Plantar Fasciitis MUCH FASTER
- How to match the right exercise routine to where you are in your recovery, so you get the best results, in the least amount of time

Learn more at: [www.PlantarFasciitisReliefIn7Days.com/home11](http://www.PlantarFasciitisReliefIn7Days.com/home11)

### Eliminate Thoracic Outlet Syndrome

FINALLY... a simple, but effective program to overcome your Thoracic Outlet Syndrome... without expensive appointments, drugs, or surgery. My easy-to-follow, step-by-step videos and guides will help you GET PAIN- FREE in as little as 7 days. Here are just a few examples of what you'll learn in my program:

- A strange exercise I discovered using a SMALL BALL... that erased hand numbness in LESS THAN ONE MINUTE
- How to properly adjust the intensity of each exercise you do, so you can recover as quickly as possible, but also make sure you don't re-injure yourself
- The exercises you should NEVER do if you have Thoracic Outlet Syndrome

Learn more at: [www.ThoracicOutletSyndromeSolved.com](http://www.ThoracicOutletSyndromeSolved.com)

### Eliminate Pain After Your Knee Replacement

This program is perfect for getting back to a pain-free life after Knee Replacement surgery. My videos and guides give you a step-by-step program that's easy and fun to follow. You'll be back to your active and enjoyable life in just a few weeks' time. Here's a small sample of what you'll learn:

- Why my program has 9 components... and why leaving any one of them out makes it much more difficult to recover and eliminate pain
- 10 different ways you can speed up your recovery after your Knee Replacement
- Why doing exercises you find on the Internet could actually RE-INJURE YOUR KNEE

Learn more at: [www.KneeReplacementHandbook.com](http://www.KneeReplacementHandbook.com)

### Overcome Your Hamstring Injury

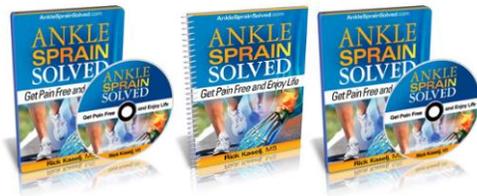

Could it really be THIS EASY to overcome your Hamstring Injury... completely on your own... without expensive physical therapy, drugs or surgery? My simple, 9-step program will erase your pain in as little as 7 days, and get you back to the full life you want. Videos, guides and photos give you the exercises and routines THAT WORK. Here's a small sampling of what you'll learn:

- Why massage isn't really helpful for Hamstring Injuries... and what is
- How to start decreasing your Hamstring pain in JUST MINUTES
- How to prevent future Hamstring Injuries

Learn more at: [www.HamstringInjurySolution.com](http://www.HamstringInjurySolution.com)

### Ankle Sprain Solved

Ankle sprains are common, and mostly a minor injury. But if they aren't properly rehabilitated, they can lead to more and greater injuries. My Ankle Sprain Solved program eliminates pain and properly heals your Ankle Sprain, so you can get back to an active and engaging life. Here are a few of the things you'll learn in the program:

- How decreasing stress and tension in your knees helps heal your Ankle Sprain
- What you need to do to PERMANENTLY heal your ankle... not just get a temporary fix
- The SINGLE most important exercise you can do to heal your Ankle Sprain

Learn more at: [www.AnkleSprainSolved.com](http://www.AnkleSprainSolved.com)

### Fix Your Frozen Shoulder

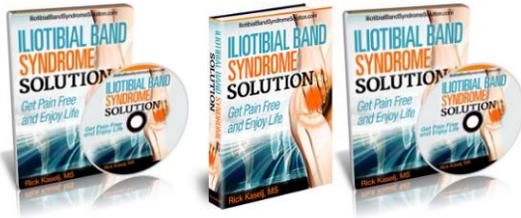

Frozen Shoulder is a common condition, but most health and fitness professionals treat it incorrectly. My program provides you with videos, guides and photos that explain this condition thoroughly, and give you a step-by-step, 7-component, 12-week program to follow that will completely eradicate your Frozen Shoulder. Here are just a few of the things you'll learn:

- The 3 most common mistakes people (and professionals) make treating Frozen Shoulder... which AGGRAVATES the condition instead of improving it
- Why stretching is an important part of fixing your Frozen Shoulder... but it's only 1 of 7 critical components in my treatment program. In my experience, the best results come when ALL 7 components are used.
- How my program is designed to provide lasting, long- term relief from Frozen Shoulder... not just a temporary fix

Learn more at: [www.FrozenShoulderSolution.com](http://www.FrozenShoulderSolution.com)

### Iliotibial Band (IT Band) Syndrome Solution

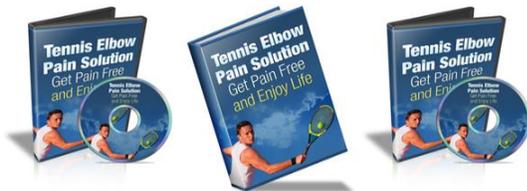

IT Band Injuries are common for runners, athletes and active people. This video -based program helps you overcome IT Band Syndrome, eliminate the pain, and get back to your active lifestyle. Here are just a few of the things you'll learn and get in this program:

- A complete program THAT ACTUALLY WORKS – it has all the exercises you need, and none that you don't
- Pain- relief techniques you can start using IMMEDIATELY
- A comprehensive explanation of how IT Band Injuries occur, and what you can do to prevent them in the future

Learn more at: [www.IliotibialBandSyndromeSolution.com](http://www.IliotibialBandSyndromeSolution.com)

### Eliminate Tennis Elbow

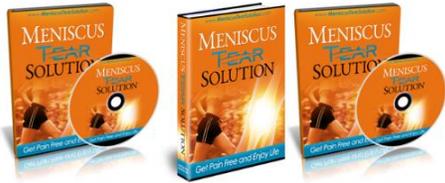

My simple, 6-step video program is PROVEN to eliminate Tennis Elbow. Before you know it, you'll once again be able to move your arms freely, pick up your kids, and grab and lift objects, all WITHOUT PAIN. Here are some of the things you'll learn in my program:

- How to diagnose yourself and make sure you definitely have Tennis Elbow
- Why you need to follow a specific plan, with a specific progression of exercises (in 3 different stages) to fully eliminate your Tennis Elbow
- How lengthening the muscles in your forearm is an important aspect of fixing your Tennis Elbow... and exactly how to do it

### Eliminate Stubborn Knee Pain (Patellofemoral Syndrome)

Patellofemoral Syndrome is a common condition that causes knee pain, especially for runners. Most health and fitness professionals are ineffective at treating this condition, so I created my Patellofemoral Syndrome Solution video program, which is backed by research and 16 years of hands-on experience treating thousands of people with knee pain. Here are just a few of the things you'll learn in my program:

- Why stretching DOESN'T fix Patellofemoral Syndrome
- How you can use common household items to perform all the exercises you need to ELIMINATE YOUR KNEE PAIN and get rid of Patellofemoral Syndrome FOR GOOD
- Why the order in which you do the exercises is important for success

### Shin Splints Solved

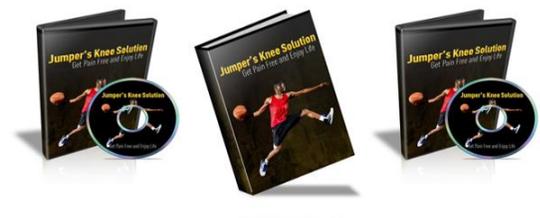

Shin Splints is a common condition, especially for runners, but most of the advice out there for treating it is ineffectual. I designed my Shin Splints Solved program after 6 years at university, 16 years of personally treating clients, and careful scrutiny of 22 relevant medical research papers. This program is HIGHLY -EFFECTIVE at eliminating Shin Splints and shin pain. You WILL be

running again – without pain – before you know it! Here's just a small sample of what you'll learn in my program:

- Why ice and stretching are only temporary fixes for Shin Splints... and what to do instead to get long-lasting relief
- Why most trainers and therapists take a shotgun approach to prescribing more and more exercises, while I ask you to focus ONLY on the exercises you absolutely need (those that are most effective at eliminating Shin Splints)
- Why most health and fitness professionals don't have you strengthen your ankles... and why you MUST if you want to erase shin pain
