A handwritten signature in black ink that reads "Rick Kaselj". The script is fluid and cursive, with the first letters of "Rick" and "Kaselj" being capitalized and prominent.

### Exercise #1: Heel Drops and Toe Raises

All of the Knee Primer exercises in this program are in a specific order, follow the order provided for the best results.

*Exercise #1: Heel and Toe Raises*

*Exercise #2: Heel to Seat*

*Exercise #3: Squatting with a Vertical Shin*

*Exercise #4: Forward and Back Leg Swings*

*Exercise #5: Side to Side Leg Swings*

*Exercise #6: Hip Rotations In*

*Exercise #7: Hip Rotations Out*

We are starting with *Toe Raises and Heel Drops*.

With this exercise, I'm working on loosening up the ankle, getting the ankle joint moving and lubricated, and then also dynamically stretching the muscles around the ankle joint. If we've got poor movement in the ankles, and stiffness in the ankles, what'll often happen is, greater stress ends up being put on the knees.

Secondly, we're trying to work on that knee being straight, as opposed to bent, and also straightening out the hip and not having it lightly bent. We want to straighten out that hip, activate the glutes and hamstrings.

To begin you'll need some sort of step. You can use a riser or the bottom step of the stairs.

I'm coming up, I've got the balls of my feet on the step, I'm going to start with the feet parallel to the ground, then I'm going to come on to the toes. I'm going to let the heels drop, then on to the toes, and heels drop again. And you can see I'm keeping my knees straight, I'm activating my glutes and hamstrings, keeping my hips straight. I'm going to go through 10 repetitions.

There may be some kind of cracking noise when doing the toe raises, but there should not be pain with that cracking, and as you do more and more repetitions, that joint lubricates more and that cracking goes away.

## Knee Primer Workout

**Start**

**End**

### Exercise #2: Heel to Seat

Knee Primer exercise #2 is *Heel to Seat*. This one is lubricating the knee joint without any weight on it, so non-weight bearing.

I'm standing, I'm close to a wall, and leaning up against that wall, touching that wall in order to eliminate balance. This isn't a balance exercise. I'm leaning, I'm going to grab the front of the ankle, or the top of the foot, and bring the heel towards the seat, and then straighten the leg out, and then bring it back again, and straighten it out. I'm working that knee through full range of motion.

Now, if I don't have full range of motion, I can bring the knee more forward and go as far as I can, and then straighten out. To make it more challenging, I can bring the knee back, tightening the abdominal area, not moving in the pelvis, straightening out, and keeping that knee back. I get more of a stretch in the front of the hip, which tends to be tight in people.

I'll do 5 repetitions on each side, or I can do 10 repetitions on each side, in order to lubricate the joint, and get that joint moving. And if you have tightness in the muscles around the knee, you might get a little bit of a dynamic stretch as well.

**Start**

**End**

### Exercise #3: Squatting with a Vertical Shin

With the *Squatting with the Vertical Shin*, we're trying to activate the muscles in the quadriceps throughout the full range of motion, when it comes to the knee. We're working on continuing to loosen up that ankle, we're working on loosening up the hips, and also activating that glute max. Lastly, we're activating all of the muscles that stabilize the foot, knee, and the hip. A lot happens when it comes to this squat with the vertical shin.

What you need is something that you can grab onto and lean back. I prefer, if I have some sort of pole, I can lean back on the pole. Now the importance of keeping that vertical shin is, in the squatting pattern, it decreases how much knee movement you need, and increases how much hip movement you end up having. And with that shin nice and vertical, it decreases the stress in the knee joint.

Going through the exercise: I begin by grabbing something, leaning back, working hard to keep my shin nice and vertical, having my weight on my heels, sitting back, bringing my seat as far back as I can, and as far back down as I can comfortably, and then coming back to the start, trying to bring the knees to straight, not hyper-extending them, and then bringing that hip to straight.

When I straighten out those hips I'm activating those glutes and hamstrings. And then as I'm coming back down again, I'm going a little bit deeper to what I can comfortably before coming back up. Remember to straighten the legs, and then straighten out the hip.

The Squat with a Vertical Shin is a very important one, and I find, with myself, it really help when I'm preparing to do front squats or back squats.

## Knee Primer Workout

**Start**

**End**

### Exercise #4: Forward and Back Leg Swings

With this one, I'm doing *Leg Swings Forward and Back*. Once again, I'm close to a wall or something that I can put my weight on in order to eliminate balance. I'm going to put all my weight on one leg, and then I'm going to swing the opposite leg forward and back. I can start off with smaller swings, and then I want to increase those swings.

When I swing it forward, I'm looking at getting a light stretch in the hamstring and the glute, and when I bring it back, I'm looking at getting a light stretch in that thigh and hip area, and going back and forth. I want minimal movement in the pelvis, so I'm not tilting forward and tilting back. I'm swinging, I'll get a little bit of movement in the pelvis, and just swinging it back and forth and trying to increase it with each repetition.

I'll do 5 repetitions or 10 repetitions on one side, and then 5 or 10 repetitions on the other side.

**Start**

**End**

### Exercise #5: Side to Side Leg Swings

This is exercise #5 for the Knee Primer. With this one, we're in the hip again, and what I'm doing is *Leg Swings Side to Side*. Once again, I'm close to a wall or something that I can grab onto in order to eliminate balance.

I'm going to stand on one leg, and I'm going to swing the leg out to the side, and then across the body, out to the side, and across the body. I don't want any rotation in the knee. I want it slightly bent. You might feel a little bit coming across, but you'll mainly feel it when you bring that leg out to the side.

You'll feel a light stretch in that inner thigh area, getting a dynamic stretch, and you'll feel the outer hip working. Swinging it in, and swinging it back out. Smooth and controlled, I can start off with smaller, and progress to bigger and bigger, movements.

I'm looking at doing 5 repetitions or progressing to 10 repetitions and doing one set.

**Start**

**End**

### Exercise #6: Hip Rotations In

Moving on to the sixth Knee Primer exercise, we're going to do *Hip Rotations In*. Once again, I'm close to a wall or I'm going to grab on to something. I'm going to lean up against a wall, I'm going to stand on one leg, the knee is slightly bent, my weight is even throughout my foot, I'm trying to keep my pelvis square. I'm going to bend the knee, bring the knee back, and bring it forward, and back again, and try to do circles with that knee focusing in on the hips.

I'm going to get some pelvis movement, but I want to minimize how much rotation happens in the knee. And as I do those rotations in, I want to try to increase with each repetition. I'm bringing that knee back, I'm getting some pelvis movement, I'm looking for a light stretch in the front of the thigh and the hip. I can feel my hamstrings and glutes work. I'm bringing the knee out to the side, and then forward, and then back again.

Slow and controlled, I'm doing 5 repetitions. I can progress to 10, and just do one set.

**Start**

**Middle (a)**

## Knee Primer Workout

**Middle (b)**

**End**

### Exercise #7: Hip Rotations Out

Lucky #7 of the Knee Primer. This one is *Hip Rotation Out*, the exact opposite from the one we just did. I've got weight even on the foot, knees slightly bent, don't want to any rotation in it, I'm close to something to eliminate balance, and as opposed to bringing the knee in, I'm coming forward and bringing that knee out, coming forward, and bringing that knee out.

I suggest starting off with a smaller movement, and then increasing as you do more and more repetitions. I'm coming forward, most likely I won't feel much of a stretch. As I bring the knee out, I'll probably feel more of a stretch in the hip. When I bring that knee back, I'll feel my glute and hamstring working, maybe a light stretch in the thigh and then the hip, and then as I do bigger and bigger rotations, I'll feel more and more in that hip.

**Start**

**End**

---

### Wrap Up

---

Those are the 7 Knee Primer exercises that I encourage you to do to prepare your knees for your workout. To summarize, the reason I do this Knee Primer Workout is to lubricate my joints, specifically the ankle, knee, and hip, loosen up the muscles around the joints, specifically the ankle, knee, and hip, and then also fire up those stabilizing muscles in the ankle, knee, and hip.

Give those 7 exercises a go. Do them in the exact order that I have gone through them. Go through them one time. Start off with 5 repetitions. You can progress to 10 repetitions. It'll take you just a couple of minutes. See how you feel *after* doing them, and then see how you feel doing your lower body exercises and your knee exercises. If you feel better and you perform better, then I would encourage you to keep doing this Knee Primer Workout.

This is Rick Kaselj from ExercisesForInjuries.com saying, "Take care and bye-bye."

---

### About Rick Kaselj

Rick Kaselj, M.S. (Exercise Science), B.Sc. (Kinesiology), PK, CPT, CEP, CES

Hi, I'm Rick Kaselj. **I create exercise programs that help people heal injuries and eliminate pain, so they can go back to living a full, active, healthy life.**

I've always been a fitness and exercise enthusiast, so starting in 1994, I decided to make this my career also. I started as a personal trainer, exercise therapist and kinesiologist, but quickly discovered that many of the traditional exercise and treatment programs weren't producing the results I wanted for my clients...

...so I took it upon myself to get the right knowledge, scour the medical research, and do hands-on testing, so I could ACTUALLY help my clients get better.

With the advent of the Internet, I saw a terrific opportunity to offer and deliver my programs to many more people, so they too could finally get relief from pain, heal their injuries, and get back to the lives they enjoy.

#### **I USE RESEARCH, STUDY, AND HANDS-ON TESTING TO FIND WHAT REALLY WORKS TO HEAL INJURIES AND ELIMINATE PAIN.**

*I'm all about finding what works...* and unfortunately, a lot of the advice out there, even from trained professionals and reputable sources... *does not work!*

**Some of the most effective methods** I've discovered for eliminating pain and healing injuries are counterintuitive... and they required diligent research, testing, and creativity to discover.

**People get the best results** when they follow a program that's been properly designed. The best programs include only the exercises that are necessary, instructions for how to perform them properly, the proper order in which to perform them, and instructions for what the right amount of rest is, and when to take it. Not doing all the steps, or performing them in the wrong order, or taking too little rest, or too much, can throw you off course, and sometimes even make things worse!

**I've learned** that understanding the CAUSE of injuries and painful conditions can help heal and prevent them. For example, most people don't realize that they're doing certain things every day that put stress and tension on certain muscles, tendons, tissues and joints, and over time, this creates chronic pain and injury. Simply becoming aware, and then making tiny adjustments, can actually result in a much higher quality of life for many people.

**All of my injury and exercise programs were developed as a result of my research, study and years of hands-on testing and training:**

- I've been in the fitness and rehab industry since 1994.
- I spent 6 years at University studying kinesiology, corrective exercise and therapeutic exercise, and got my Master's Degree in exercise science.
- I have 16 years of hands-on experience, working directly with clients and teaching my techniques and programs to fitness professionals, Kinesiologists, and healthcare providers.
- I've conducted thousands of personal training sessions.
- I've carefully scrutinized hundreds of relevant medical research papers.
- I'm also an author and speaker and I've given over 260 presentations to more than 5,000 fitness professionals across Canada and USA.

---

### WHAT MY CLIENTS AND CUSTOMERS SAY:

“Your exercises have changed my life. I have been in constant pain for 15 years.” ***Shelley Watson, Carmel, CA***

“I just wanted to say thank you for providing what I needed to resolve my hip problem! After following your exercises, I went through work all day with no pain and no pain medication. Yeah!! Thanks so much for a simple answer to a problem I have been dealing with for months.” ***Tracy Walker, North Carolina***

“Before I used the information, I couldn’t walk normally for at least the first 15 minutes each morning. After using the program, I only have a little pain, but it eventually all got better with continued attention.” ***Cher Anderson, Athens, TN***

“Thank you Rick, you saved my career!” ***Marco Mura, Professional Forester, Sardegna, Italy***

“I used the 90 second pain relief alone and it helped relieve the pain right away and after playing sports I feel better and the pain is not as intense. I thought I would just have to retire due to the foot pain, but I now see there is hope with your program it has helped me a lot.” ***Audal Acosta***

---

### I HAVE A FREE GIFT FOR YOU...

#### THAT WILL START DECREASING YOUR PAIN NOW!

Before we go any further, I want to send you some of my very best stuff FOR FREE!  
It's my introductory gift to you. (I like to give value first, and be as helpful as I can upfront.)

My newest DVD is called "The Pain Hacker" and **I want you to have it for free.**

What is it? It's an extensive collection of 90-second pain fixes that you can do to start reducing the pain you have right now. On the video, I go through each technique slowly and carefully to show you exactly how to do them, so you can start reducing your pain and get back to a healthy, more active life.

I don't want to give away too much here, but...

- "The Pain Hacker" DVD contains 90-second pain fixes for shoulder, back, knee, elbow, foot, neck, wrist, hip, hand pain, and much more.
- The pain techniques in this DVD will work for you regardless of your current health condition, gender or age!
- With your free DVD, I'm also going to throw in two bonus programs that will teach you simple exercises that could radically change the way you feel, day-to-day.
- My unconventional "Pain Fixes" in your free DVD have been featured and talked about in these publications (and more).

Get your FREE DVD at: [www.ThePainHacker.com/free-DVD-2](http://www.ThePainHacker.com/free-DVD-2)

### Other Products from Rick

#### Heal Rotator Cuff Injuries FAST

This comprehensive toolbox of 57 rotator cuff- specific exercises is **EVERYTHING** you need to help your clients decrease pain, improve range of motion, and increase strength in their rotator cuffs. Here are just a few of the things you'll discover:

- Why exercises that strengthen rotator cuffs do not necessarily decrease pain and increase range of motion in your clients' shoulders
- Why you shouldn't give the same exercises to every client with rotator cuff problems
- How to **PROPERLY** design an exercise program for the rotator cuff (I spent an entire year researching this at university, and wrote and published a paper on it in the Canadian Journal of Kinesiology)

Learn more at: [www.EffectiveRotatorCuffExercises.com](http://www.EffectiveRotatorCuffExercises.com)

#### Scoliosis Secrets

In just a few weeks, your Scoliosis patients will be thanking you! This program delivers the knowledge and exercises you need to safely and effectively train or heal anyone with Scoliosis. Here are just a few samples of what you'll learn and get in this program:

- The Three 'O' medical treatments for Scoliosis, and step-by-step instructions on how to do them
- The 7 different types of Scoliosis... how to diagnose your clients... and which exercises to prescribe for each
- **CLIENT HANDOUTS** that you can copy and give to your clients, completely **DONE FOR YOU!**

Learn more at: [www.EffectiveExercisesForScoliosis.com](http://www.EffectiveExercisesForScoliosis.com)

### Scapular Stabilization Secrets

This is the RESEARCH- BACKED exercise program that will finally help your clients decrease pain, improve range of motion, and increase shoulder stability. What will you learn?

- My secret weapon for healing shoulder injuries
- Why most trainers and therapists focus on the rotator cuff in a shoulder injury, when they should focus on improving the activation, endurance, and strength of the scapular muscles
- Why your Scapular Stabilization exercise program is a waste of time... unless it includes all 5 of these components

Learn more at: [www.ScapularStabilizationExercises.com](http://www.ScapularStabilizationExercises.com)

### Eliminate Calf Pain (Achilles Tendinitis and Tendinosis)

Do you have recurring pain in your calf? Have you been diagnosed with Achilles Tendinitis or Tendinosis? If so, my research -backed video exercise program is for you! Simple step-by-step videos take you through a specially -designed program to eradicate your calf pain, Achilles Tendinitis, and Tendinosis ONCE AND FOR ALL. You'll be back to hiking, walking and running before you know it. Here's a small sampling of what you'll learn in the program:

- QUICK START (non-exercise) techniques you can use to start melting your calf pain away RIGHT NOW
- ALL the exercises you need to eliminate your calf pain... AND I'll tell you the exercises that are commonly prescribed, but you don't need to worry about
- How to do each exercise, with slow, step-by-step instructions... the correct order you should follow... and how much rest you should take... to get the best and fastest results

Learn more at: [www.AchillesTendinitisExercises.com](http://www.AchillesTendinitisExercises.com)

### Eliminate Piriformis Syndrome

The step-by-step exercise program that ANYONE can do... that heals your Piriformis Syndrome, and allows you to: take long walks again, watch entire movies without getting up, easily lift your child... all without any pain. Here are just a few samples of what you'll learn and get in this program:

- Why you need to do more than just strengthen your core to eliminate your Piriformis Syndrome
- How to start decreasing your pain IMMEDIATELY, WITHOUT ANY EXERCISE
- These stretches and exercises are making your Piriformis Syndrome WORSE

Learn more at: [www.PiriformisSyndromeSolution.com/end-piriformis-pain](http://www.PiriformisSyndromeSolution.com/end-piriformis-pain)

### Fixing Tight Hip Flexors

This video program has 35 exercises and other techniques designed to help you overcome painfully Tight Hip Flexors... without expensive appointments, drugs, or surgery. You'll be back to walking, running, and creating fun memories with your friends and family in just a few weeks! Here's a small sampling of what you'll learn in the program:

- THE SINGLE MOST IMPORTANT movement you need to do in order to overcome your Tight Hip Flexors (it's Component #8 in the program)
- Why it's important to decrease stress and tension in your knee, in order to fix your tight hip flexors... and how to do it properly
- The 8 CRITICAL COMPONENTS that must be included in any effective program for fixing Tight Hip Flexors (these components come from 16 years of hands-on experience and careful scrutiny of 30 separate medical research papers)

Learn more at: [www.FixingTightHipFlexors.com](http://www.FixingTightHipFlexors.com)

### Heal Back Pain (Gluteus Medius Strength Program)

This exercise program **ELIMINATES BACK PAIN** by strengthening your Gluteus Medius. The Gluteus Medius is often ignored, but when properly exercised and strengthened, it can stabilize your pelvis and decrease stress on your back, which eliminates back pain. In this program, you'll learn these things (and much more):

- How to eliminate your back pain as quickly as possible (HINT: you must do the exercises in the right order so they build on each other and your progress is multiplied!)
- What most trainers and physical therapists don't know about back pain and the Gluteus Medius
- Why exercises that target your knees and hips also strengthen the Gluteus Medius and help with back pain

Learn more at: [www.GluteusMediusExercises.com](http://www.GluteusMediusExercises.com)

### Best Gluteus Maximus Exercises

This is a fast, simple, safe, and effective program for improving your Gluteus Maximus. Most health and fitness professionals don't know about this program, or are doing it wrong. In as little as 7 days, you can go back to pain-free walking, running and living! Here are a few samples of what you'll learn in the program:

- Stretches and exercises that actually make your Gluteus Maximus **WORSE**
- Common mistakes people make doing Gluteus Maximus exercises
- The correct form for all of the exercises, shown step-by-step on easy-to-follow videos

Learn more at: [www.BestGluteusMaximusExercises.com](http://www.BestGluteusMaximusExercises.com)

### How To Speed Up Recovery Between Workouts

SPENDING A CENT!

Do you want to get better results from your workouts? Experience fewer aches, pains and injuries between workouts? Spend less time and money at the massage therapist? This comprehensive video program is going to help you achieve all that and more. Here are just a few of the things you'll be learning:

- What you should NEVER do if you have aches and pains between workouts
- 3 techniques and unconventional tools that RAPIDLY speed recovery between workouts
- How to get the powerful recovery effects of massage, WITHOUT

Learn more at: [www.RecoveryWorkouts.com](http://www.RecoveryWorkouts.com)

### No More Neck Pain

What if you could PERMANENTLY end your neck pain? This INNOVATIVE video program will teach you the simple movements and proven exercises that will make that a reality for you. Here are a few of the things you'll learn:

- An UNUSUAL technique that can start melting your neck pain away IMMEDIATELY
- How to get lasting, long- term relief for your

neck... not just a temporary fix

- What I learned working with hundreds of clients with neck pain that most other professionals will never know

Learn more at: [www.NeckPainSolved.com](http://www.NeckPainSolved.com)

### Erase Foot & Heel Pain (Plantar Fasciitis)

How do you eliminate Plantar Fasciitis? Do the right exercises, in the right order, with the right amount of rest. This simple, 12-week program gives you EXACTLY what you need to permanently erase your foot and heel pain. Here's a small sampling of what you'll learn:

- Why trying to strengthen your plantar fascia is a common mistake, and only makes your heel pain WORSE (hint: the plantar fascia is not a muscle!)
- One simple technique that anyone can do... that will get rid of your Plantar Fasciitis MUCH FASTER
- How to match the right exercise routine to where you are in your recovery, so you get the best results, in the least amount of time

Learn more at: [www.PlantarFasciitisReliefIn7Days.com/home11](http://www.PlantarFasciitisReliefIn7Days.com/home11)

### Eliminate Thoracic Outlet Syndrome

FINALLY... a simple, but effective program to overcome your Thoracic Outlet Syndrome... without expensive appointments, drugs, or surgery. My easy-to-follow, step-by-step videos and guides will help you GET PAIN- FREE in as little as 7 days. Here are just a few examples of what you'll learn in my program:

- A strange exercise I discovered using a SMALL BALL... that erased hand numbness in LESS THAN ONE MINUTE
- How to properly adjust the intensity of each exercise you do, so you can recover as quickly as possible, but also make sure you don't re-injure yourself
- The exercises you should NEVER do if you have Thoracic Outlet Syndrome

Learn more at: [www.ThoracicOutletSyndromeSolved.com](http://www.ThoracicOutletSyndromeSolved.com)

### Eliminate Pain After Your Knee Replacement

This program is perfect for getting back to a pain-free life after Knee Replacement surgery. My videos and guides give you a step-by-step program that's easy and fun to follow. You'll be back to your active and enjoyable life in just a few weeks' time. Here's a small sample of what you'll learn:

- Why my program has 9 components... and why leaving any one of them out makes it much more difficult to recover and eliminate pain
- 10 different ways you can speed up your recovery after your Knee Replacement
- Why doing exercises you find on the Internet could actually RE-INJURE YOUR KNEE

Learn more at: [www.KneeReplacementHandbook.com](http://www.KneeReplacementHandbook.com)

### Overcome Your Hamstring Injury

Could it really be THIS EASY to overcome your Hamstring Injury... completely on your own... without expensive physical therapy, drugs or surgery? My simple, 9-step program will erase your pain in as little as 7 days, and get you back to the full life you want. Videos, guides and photos give you the exercises and routines THAT WORK. Here's a small sampling of what you'll learn:

- Why massage isn't really helpful for Hamstring Injuries... and what is
- How to start decreasing your Hamstring pain in JUST MINUTES
- How to prevent future Hamstring Injuries

Learn more at: [www.HamstringInjurySolution.com](http://www.HamstringInjurySolution.com)

### Ankle Sprain Solved

Ankle sprains are common, and mostly a minor injury. But if they aren't properly rehabilitated, they can lead to more and greater injuries. My Ankle Sprain Solved program eliminates pain and properly heals your Ankle Sprain, so you can get back to an active and engaging life. Here are a few of the things you'll learn in the program:

- How decreasing stress and tension in your knees helps heal your Ankle Sprain
- What you need to do to PERMANENTLY heal your ankle... not just get a temporary fix
- The SINGLE most important exercise you can do to heal your Ankle Sprain

Learn more at: [www.AnkleSprainSolved.com](http://www.AnkleSprainSolved.com)

### Fix Your Frozen Shoulder

Frozen Shoulder is a common condition, but most health and fitness professionals treat it incorrectly. My program provides you with videos, guides and photos that explain this condition thoroughly, and give you a step-by-step, 7-component, 12-week program to follow that will completely eradicate your Frozen Shoulder. Here are just a few of the things you'll learn:

- The 3 most common mistakes people (and professionals) make treating Frozen Shoulder... which AGGRAVATES the condition instead of improving it
- Why stretching is an important part of fixing your Frozen Shoulder... but it's only 1 of 7 critical components in my treatment program. In my experience, the best results come when ALL 7 components are used.
- How my program is designed to provide lasting, long- term relief from Frozen Shoulder... not just a temporary fix

Learn more at: [www.FrozenShoulderSolution.com](http://www.FrozenShoulderSolution.com)

### Iliotibial Band (IT Band) Syndrome Solution

IT Band Injuries are common for runners, athletes and active people. This video -based program helps you overcome IT Band Syndrome, eliminate the pain, and get back to your active lifestyle. Here are just a few of the things you'll learn and get in this program:

- A complete program THAT ACTUALLY WORKS – it has all the exercises you need, and none that you don't
- Pain- relief techniques you can start using IMMEDIATELY
- A comprehensive explanation of how IT Band Injuries occur, and what you can do to prevent them in the future

### Eliminate Stubborn Knee Pain (Patellofemoral Syndrome)

Patellofemoral Syndrome is a common condition that causes knee pain, especially for runners. Most health and fitness professionals are ineffective at treating this condition, so I created my Patellofemoral Syndrome Solution video program, which is backed by research and 16 years of hands-on experience treating thousands of people with knee pain. Here are just a few of the things you'll learn in my program:

- Why stretching DOESN'T fix Patellofemoral Syndrome
- How you can use common household items to perform all the exercises you need to ELIMINATE YOUR KNEE PAIN and get rid of Patellofemoral Syndrome FOR GOOD
- Why the order in which you do the exercises is important for success

### Shin Splints Solved

Shin Splints is a common condition, especially for runners, but most of the advice out there for treating it is ineffectual. I designed my Shin Splints Solved program after 6 years at university, 16 years of personally treating clients, and careful scrutiny of 22 relevant medical research papers. This program is **HIGHLY -EFFECTIVE** at eliminating Shin Splints and shin pain. You **WILL** be

running again – without pain – before you know it! Here's just a small sample of what you'll learn in my program:

- Why ice and stretching are only temporary fixes for Shin Splints... and what to do instead to get long-lasting relief
- Why most trainers and therapists take a shotgun approach to prescribing more and more exercises, while I ask you to focus **ONLY** on the exercises you absolutely need (those that are most effective at eliminating Shin Splints)
- Why most health and fitness professionals don't have you strengthen your ankles... and why you **MUST** if you want to erase shin pain
